Vue, Angular

UML modeling and OOP concept

JSON, XML, REST principles and services

Heroku, GIT

I was in touch with Linux

LANGUAGES

Serbian

English (intermediate)

EDUCATION

High school - economic technician

2014 - 2018

Student at Faculty of technical sciences(FTN) – software and information technology

2018 - present

PROJECTS

Projects that I have worked on are mostly based on web development, technologies used for them are Spring boot and Django.

Applications that I worked on are student service(Spring boot, Angular), email client(Spring boot, Android), web shop(Django), blog(Django), barber appointment(Vue, firebase).

Also I work on desktop applications, that was used for setting up appointments in hospital, technology that I used is C#(.NET).

When it comes to information security, I have done some work on hashing messages for sending emails.

Real projects

www.domzastare-klisaric.rs

Website for local nursing home.
(Vue + Firebase + prerendered)

www.sanjamuskistudio.web.app

Web app for haircut appointment.
(Vue + Django rest framework + Firebase)
